Workflow

1 select an issue

- change issue from todo list in doing list
- assign issu to yourself
- create merge request as draft
- replace description closes by /label ~"In review"
- uncoched delete source branch option
- copy branche name

2 update code

- git switch branche_name
- update code
- git add .
- git commit -m "description"
- git push origin branche_name

3 Merge branch into main

- set merge request as ready
- check pipeline result
- merge request
- check github repository
- check doc compilation
